

# **\*\*\*\*PUBLIC NOTICE\*\*\*\***

Please be advised that a three dimensional (3D) seismic exploration program is planned for the area around the town of Delisle in the Rural Municipality of Vanscoy. (see map below).

This regional seismic program is being conducted on behalf of Nutrien – Tech Services by RPS Energy Canada Ltd. in order to assess potential potash mineralization.

The seismic process involves sending vibrations into the earth and measuring the returning waves. The energy source will be setback from all structures in accordance with Saskatchewan Seismic Exploration Regulations.

Please note that unless you have been contacted, your lands are not being entered. No private or public property will be accessed without prior consent.

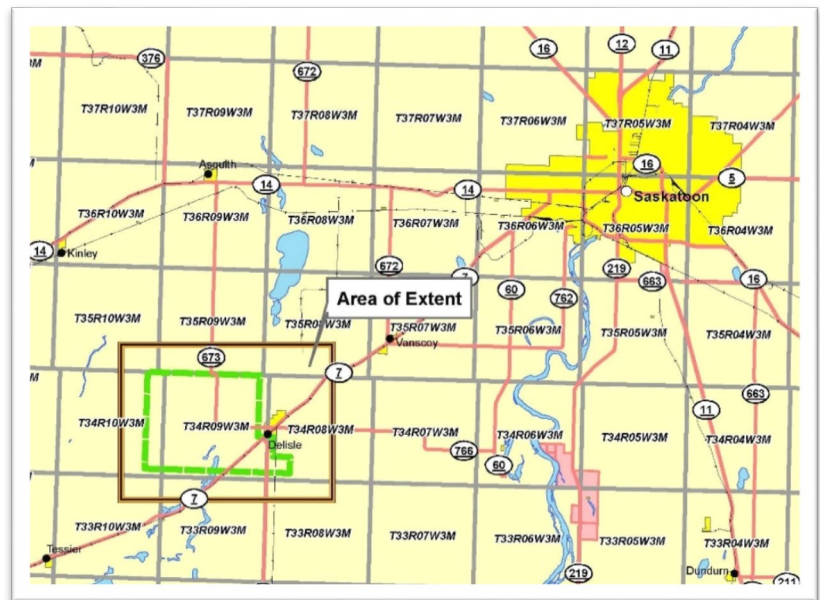

Exploration Company: RPS Energy Canada Ltd.  
 Commencement of Field Operations: week of February 16, 2019  
 Completion of Recording Operations: March 31, 2019  
 Program Name: 2019 Delisle West 3D

Should you have any questions, please contact:

**Geoff Boedeker**  
 RPS Field Supervisor  
 Phone: 1.403.875.9504

**Bill Russell**  
 RPS Community Liaison  
 Phone: 1.403.620-2862

**Orrin Foster**  
 RPS Calgary Head Office  
 Toll Free: 1.800.663.8943

We try to conduct our operations with the utmost respect for both private and public lands. We ask that the public please respect the efforts of our crews to post signage and survey lathe informing travelers of our presence. These signs and survey lathe are vital for the safety of the public, as well as the safety and efficiency of our crews. The sooner we can complete this program, the sooner we can remove this important signage and other evidence of our presence. We thank you for your consideration and cooperation.
